Abstract (en)  
The security device for ladders of the invention is characterized in that it comprises a body (1) engageable with a step (2) of the ladder (3), said engageable body (1) being provided with a holding element (4), which permits to hold a security rope (5) to a post (6), and a fixing element (7) in which the upper end of said security rope (5) is fixed. It permits the operator that uses the ladder to be completely protected from the moment he/she begins to climb the ladder.
