Abstract (en)
[origin: WO2009037127A1] A cabinet-like domestic appliance has a basic structure and a door which enclose an interior: a telescopic pull-out means (2) mounted in the interior comprises at least one rail (21) which can be moved in the depthwise direction of the interior. The rail (21) bears a lug (23) which is directed towards the rear wall (3) of the interior, is made of ferromagnetic material and, in a retracted stopping position of the telescopic pull-out means (2), is exposed to an attractive magnetic force of a magnet (4) which is mounted on the rear wall (3).
