Abstract (en)
[origin: WO2009043558A1] The present invention relates to a handle (4) for a piece of sport equipment, particularly for a tennis, squash, racquetball, table tennis, or badminton racquet, or golf club. The handle has a force measurement device (11) attached thereto, which is suitable for measuring a force acting on the handle applied by the hand of a player surrounding said handle. The handle further comprises an electronic analysis unit (16) that is electrically connected to the force measurement device. The force measurement device comprises at least one force sensor (12) with a flat design that is attached to the handle such that the force transferred from the player's hand can be measured by the force sensor.
