Abstract (en)

[origin: FR2921475A1] The paint ball (1) has a spherical shaped cover (10) containing an aqueous marking paint composition (11). The cover is made of non-hydrosoluble oxo-biodegradable polymeric material such as oxo-biodegradable polyethylene and oxo-biodegradable polyolefin, where the polymeric material includes synthetic polymer and transition metal salt. The cover has a thickness comprised between 80 to 120 micrometers. The composition contains 40-60, 0-5, 20-40, and 5 percentages of water, coloring substances, a binder and sodium chloride, respectively. An independent claim is also included for a method for manufacturing a paint ball.
