Abstract (en)

[origin: WO2009032761A2] Embodiments of the present invention generally relate to a community-based recycling system and methods of utilizing same. In one embodiment of the present invention, a community-based recycling system comprises a first entity, providing recyclable material, a second entity, providing recyclable material, a load determining device for obtaining a qualitative or quantitative measurement of the recyclable material accumulated from both the first entity and the second entity, and a reward granted equally to each of the first entity and the second entity, wherein the reward corresponds to a value generated from the measurement of the recyclable material.
