Abstract (en)

[origin: WO2009026726A1] A system and method enabling users to perform activities centered on their environment and their home, namely to automatically create a precise 3D model of their home, office or other interior, from standard photos or video, visualize and personalize any aspect of the created 3D model, shop for furniture and accessories within that 3D environment, from fine art to whole sale products, and share their 3D models and designs, renovation and shopping tips with friends and the general public.
