Abstract (en)
[origin: WO2009040163A1] The invention relates to a brush for an electrical machine, having a brush spring and at least one brush body which is arranged on said brush spring, wherein the brush spring is of substantially C-shaped design and has two limbs which extend away from the brush body on either side and with which limbs the brush spring can be arranged on a brush carrier of an electric motor, wherein the brush spring has straight and curved regions. Provision is made for the brush spring (2) to have a reinforcement (12, 23, 25) on at least one section (11) of one of the straight regions (6, 21, 24).
