Abstract (en)  
[origin: WO2009108027A2] The present invention relates to methods of efficiently transmitting signals, an efficient receiver, and methods of efficiently receiving the signals. In particular, the present invention relates to receiving signals and deinterleaving bits between Low Density Parity Check (LDPC) blocks of bitstreams of the received signals in a twisted fashion. In addition, the present invention relates to methods of efficiently transmitting signals which are counterparts of the receiving methods.
