Abstract (en)

[origin: EP2196101A1] [Problems] To present a brassiere that can be disassembled and can be adjusted in size. [Solving Means] A brassiere 1 is composed of a pair of skeletons 4 composed of an elastic material formed so as to be linked oscillatably to each other, consisting of length-adjustable first, second, and third frameworks 9, 10, 11a, 11b, 11c, a pair of covering materials 5 for covering the pair of skeletons 4 and forming a pair of cups, a cup connection member for pivoting one end so as to be tightened, composed of a pair of arms for coupling separately the pair of skeletons 4, a breast band 7 adjustable in length and having a pair of detachable stopping parts, and a band connection member 8 separably coupled to each outer side end of each skeleton 4, and for coupling the end parts of the breast band 7. Since the skeletons 4, the covering parts 5, and the breast band 7 are separable, the wearer can replace with covering materials 5 of a desired design, or replace broken components, and the size of the skeletons 4 can be changed.
