Abstract (en)  
The stick has a blade, and a handle attached at a detachable round shaft (4), where the shaft and handle are provided with a groove (22) and a guiding surface (23) cooperating as a locking device. A detachable fastening unit (19) i.e. screw, interfusing the shaft is provided for the handle, where the handle partially extends into interior of the shaft. The shaft is overlapped by the handle below a region of the fastening unit, and the handle has a rigid inner part (10) at which the guiding surface, the groove and a supporting surface are formed.

Abstract (de)  
Bei einem Unihockeyschläger ist ein am Schaft (4) lösbar befestigter Griff (5) vorgesehen. Die Befestigung erfolgt mit einer den Schaft durchsetzenden Schraube (9) und zusätzlich ist eine separate Verdrehsicherung vorgesehen, die durch zusammenwirkende Flächen an Schaft und Griff ausgeführt ist. Dies erlaubt eine einfache Montage und Demontage von Schaft und Griff.
