Abstract (en)

[origin: EP2196401A1] The pallet (7) has four angular pallet feet (11), two cross beams (8,9) and two longitudinal faces (3). The tubular elements are arranged in the pallet feet such that a longitudinal axis runs in a direction of force. A longitudinal rod and two pallet feet are formed from a continuous angular pipe with an internal lying round pipe. The angular pipe has two recesses. The pallet is made up of recycling cardboard or paper. An independent claim is also included for a method for manufacturing a pallet.
