Abstract (en)
[origin: EP2065524A2] The device has a groove-shaped draining body (1) with an inlet opening through which waste water enters. The draining body exhibits a discharge opening (5) through which the waste water is discharged. A sectioned plate-shaped part (2) is provided as a part of a base of a moist area e.g. barrier-free shower. The draining body and the sectioned part are pre-mounted to a unit. The draining body is made of plastic and metal e.g. steel. The draining body and the sectioned part are detachably and non-detachably connected with each other.
