Abstract (en)

[origin: EP2196760A2] The truck (1) has a driving cab (2) arranged at a chassis frame and pivotable from a driving position to a maintenance position. A separate body (3) is firmly connected with the chassis frame. A passage (4), which is protected against fire, is arranged between the cab and the separate body. A closable opening for entering or leaving the passage is arranged in a rear wall of the cab and in front wall, which is turned towards the passage, of the body. The cab is provided with a cover that is arranged at a flange.
