Abstract (en)

[origin: EP2196890A2] A method for providing a graphical user interface (GUI) and an electronic device using the method are provided. The method includes forming one or more groups of GUI items (110, 120, 140, 150) other than a GUI item (130) selected by a user, moving the GUI items (110, 120, 140, 150) in the one or more groups, and enlarging and displaying the selected item (130) on an area formed by movement of the GUI items. Therefore, it is possible to provide a GUI which preferably may enable easy manipulation and which is displayed with superior visual effect on a screen that is relatively small in size.
