Abstract (en)

[origin: US2009090375A1] A multi-function cosmetic device having a first and a second component, each removable from one another wherein the second component has a first section and a second section each of which are removable from one another. The front of the first component and the fronts of the first and second sections are working components, such as, but are not limited to, fingernail brushes, fingernail scrapers/cleaners, fingernail design tips, and make-up brushes. Additional independent stackable components, each having a similar working component at their respective front ends, are removably stackable onto the fronts of either first component or the fronts of the first and second sections of the second component and are removably stackable onto each other.
