Abstract (en)
[origin: WO2009036824A1] The invention relates to a floor-cleaning appliance having a housing, on the underside of which is arranged at least one floor-cleaning tool which can be driven in rotation or oscillation, wherein the floor-cleaning appliance, for the purpose of cleaning a floor surface, can be guided manually by the user in an operating direction along the floor surface. In order to develop the floor-cleaning appliance such that it can easily be transported, it is proposed according to the invention that the floor-cleaning appliance has transporting wheels which can be fixed by the user, for the purpose of transporting the floor-cleaning appliance, such that they can be rotated on wheel bearings arranged laterally on the housing.
