Abstract (en)

[origin: FR2921598A1] The headrest (1) has a reverse U-shaped tubular armature (2) including an upper part (3) folded towards the front so as to be enrolled in a plane parallel to a plane defined by a lower part of U-shaped branches (4). A rigid front shell (5) covers the part and has a front surface (6) and a rear surface (7) that is provided with an associating unit (8). A rectangular blank (9) is associated to the shell by fixation units i.e. fasteners, and made of coating material. An elastic block (10) is arranged between the blank and the surface (6) and made of aggregated flexible foam flock.
