Abstract (en)  
[origin: WO2009046911A1] The invention relates to a sliding door (1) of a vehicle, particularly of a rail vehicle having at least one door leaf (2), wherein a seal is provided at least in sections in the gap (3) between the door leaf (2) and the outer door trim (4). In order to obtain a better sealing effect, a sealing profile (5, 6) protruding into the gap (3) is provided on the outer door trim (4) and on the door leaf (2), said sealing profile comprising at least one sealing strips (5', 6'), wherein the sealing strips (5', 6') of the sealing profiles (5, 6) are offset relative to each other and cover each other at least partially.
