Abstract (en)  
[origin: WO2009046905A2] The invention relates to a case for a dive computer that is worn by a scuba diver during dives. Said dive computer comprises a display device for displaying dive-related data that are visible from outside the case, actuation devices of the dive computer that can be actuated from outside the case and fastening devices for fastening the dive computer on the scuba diver or on his/her equipment. The case interior of the dive computer is configured in such a manner that the forces acting upon the dive computer due to the water pressure are compensated to at least some degree.
