Abstract (en)
[origin: WO2009033440A1] The invention relates to an auxiliary device for setting up the lower and upper luffing supports of an adjustable auxiliary boom, which is disposed at the head of the main boom of a mobile crane. The invention is characterized by - a set-up stand (6), which is connected to the lower luffing support (8), - a connecting rod strand (12), which can be connected to the hoisting cable (7) of the main hoisting gear (10) and - which is articulated to the tip of the lower luffing support (8), and by - a traction force member strand (11) between the lower luffing support (8) and the upper luffing support (9).
