Abstract (en)

[origin: WO2009033942A1] The invention relates to a reinforcement layer for elastomeric products, wherein the reinforcement layers are hybrid cords, which are arranged substantially parallel to each other within the layer and which are composed of a first twisted textile yarn made of a first material and a second twisted textile yarn made of a second material, the ends of both yarns being twisted with each other, wherein the first twisted textile yarn is a polyketone yarn.
