Abstract (en)

[origin: EP2198743A1] The applicator (2) has a rod (7) connecting a product applying element (8) and a gripping element i.e. closing cap (5). A longitudinal axis of the gripping element is oriented with respect to the longitudinal axis of the rod in a non-adjustable manner. The gripping element has a marker (5b) arranged on the applying element. The applying element has a predefined angular position relative to the marker such that positioning of the applicator given by the marker corresponds to utilization of predefined application faces of the applying element. Independent claims are also included for the following: (1) a method for fabrication of an applicator (2) a method for realizing a make-up on eyelashes or eyebrows.
