Abstract (en)

[origin: EP2199047A2] The device has a base shuttering element (12) extending in a longitudinal direction of the device. A fixture shuttering element (38) is fixed to the base shuttering element, and a fixture element (40) is provided on a lower side of the fixture shuttering element. A gripping head (30) is aligned with the fixture element, and is detachably coupled with the fixture element by a positive-fit connection. The head is provided with tapered external diameter, and the fixing element is formed as a fork element, which is positive-fit suspended in a longitudinal direction on the head.
