Abstract (en)

The invention relates to an anti-counterfeiting element for an identification document, said anti-counterfeiting element being able to reveal different sets of data or images superimposed onto a background when tilting the document. The anti-counterfeiting element comprises two separate fragments (F1, F2), each of which comprising part of data/images to be revealed and part of the background, each fragment being provided on each side (S1, S2) of said identification document and overlapping each other through the thickness of said identification document.
