Abstract (en)

[origin: EP2199451A2] The water-conducting household appliance (1) is provided with a treatment tank (12) and a continuous water supply (7). The water supply has a venturi pump (10) with a suction side (30). A liquid container (5) is provided for temporary storage of the liquid medium. The liquid container is connected with the suction side of the venturi pump. An independent claim is included for a device assembly, which has a connector.
