Abstract (en)  
[origin: EP2199454A2] The household appliance (1) has an open air duct (8) and a flow cross-section adjusting device (10) which is arranged for adjusting a flow cross-section of the air duct. The flow cross-section adjusting device has multi-disk (11) rotably supported for a sound insulation. The air duct and the flow cross-section adjusting device are arranged to a heat exchanger or a compressor (6) of the household appliance in a cooling air-supplying area.
