Abstract (en)  
[origin: EP2199458A1] The forming fabric (1) has a textile sheet material (2) formed from fiber and knit fabric. Connecting threads (15) extend perpendicular to a running direction (A) and are inserted on paper sides (3) of the sheet material for forming a paper web. The connecting threads are released between dewatering surfaces continuously extending along an extension of the threads and a plane of the threads. The threads have a breadth of 0.49 mm in a projection perpendicular to plane of the sheet material and cover 50 percentages of an entire surface of the sheet material.
