Abstract (en)
[origin: EP2199480A2] The system has a vertically arranged pole (3), and lower and upper cross bars (4, 5) connected to each other by a pole-bar connector, where rooms (I, II) and a corridor (III) are partially, climatically, acoustically and/or optically separable from each other by the system. The connector has a fixing element and a connecting element with a hook and a plate, where the plate intervenes with the hook. The fixing element has a fixing surface by which the fixing element is fixed to an outer surface of the pole or cross bars. A clamping element is insertable into a longitudinal groove in the pole.
