Abstract (en)

[origin: EP2199481A2] A support system (1) for space-divider partition walls comprises lower guide means (2) and upper guide means (3) which extend longitudinally along a preferential axis. The guide means (2, 3) comprise at least one compartment (7) which is defined by two side walls (9) and also extends longitudinally along the preferential axis, the compartment (7) being suitable for housing ends of one or more partition panels (4) in its interior in use. The system further comprises adaptation means (13) disposed in the at least one compartment (7) of the lower guide means (2), the adaptation means (13) comprising at least one inclined contact surface (15) which is intended to remain in contact with the ends of one or more partition panels (4) in use.
