Abstract (en)
The covering comprises tiles made of plastic-material bases and top plates joined to the bases, the latter including by their edges male and female anchoring elements which are complemented to each other in order to couple tiles to one another. Furthermore, anchoring elements (3 and 4) are arranged below the fastening plane of the top plates (2), while said anchoring elements (3 and 4) extend from short perimeter support legs (7') which are part of the plastic-material bases thus attaining greater rigidity as well as much more solid and stable anchoring between tiles.
