Abstract (en)

[origin: EP2199527A2] The kit has a rotatably supported roller blind shaft (170) provided with an insulating pad that includes a hook profile. An assembling aid has a plugging element with a recess, where shape of the plugging element is adapted to the roller blind shaft. An actuator is arranged in the plugging element for the hook profile of the insulating pad. A traction element e.g. belt strap, is arranged in the plugging element. The actuator has a hook element that is supported against a circumference surface of the plugging element using a spring element.
