Abstract (en)
A gas stove(1) includes a panel (7), a burner (3), a thermocouple (8) and an ignition needle (9) disposed near the burner (3), and at least one control switch (11) disposed on the panel (7) to control and set gas supply at the corresponding burner (3). The gas stove (1) further includes a main switch (10). When the main switch (10) is turned on, a working status of the gas stove (1) is suspended and/or locked. When the main switch (10) is turned off, the suspended and/or locked working status of the gas stove (1) is restored automatically. Regarding the gas stove (1) in the technical solution, the working status of the whole gas stove (1) can be suspended and restored rapidly and all the settings of the working status are reserved during the period of suspension.
