Abstract (en)

[origin: CN101752681A] The invention relates to a connecting device used for connecting at least one optionally insulated stranded and/or fine stranded conductors with a busbar piece, wherein the busbar piece forms a connecting bracket (1) with closed periphery, and a penetrating contact bolt (8) passes through the connecting bracket (1) on two parts of the periphery, and the penetrating contact bolt is designed to for being contact connection with the stranded and/or fine stranded conductors of the penetrating contact bolt in contact connection state.
