Abstract (en)
[origin: EP2200124A1] The device has a contact screw contactingly pressing a flat conductor and a bus bar together. The screw penetrates through the conductor and the bus bar in a contact position. A connector housing receives the bus bar, the flat conductor and the screw. The connector housing includes a cover strip fixable in a base (1). The base includes a mounting surface for mounting on a substrate i.e. printed circuit board or a surface of a solar collector. The screw is aligned perpendicular to the mounting surface in a mounting position of the base.
