Abstract (en)

The telephone has a ringing mechanism (1) including a sound element e.g. tube (10), for producing a musical note. The mechanism includes an actuator member e.g. impact hammer (8), which is in mechanical contact with the sound element so as to enable the sound element to produce a sound. An electronic control unit controls the ringing mechanism, and comprises a microcontroller connected to a main processor. The microcontroller has an output that is connected to a rotating electric motor via an amplification circuit.

Abstract (fr)

Le téléphone portable selon l'invention est caractérisé par le fait qu'il comprend un mécanisme de sonnerie (1) comprenant au moins un élément sonore (10) et au moins un organe actionneur (8) apte à venir en contact mécanique avec l'élément sonore (10) pour lui faire produire un son, et des moyens électroniques de commande du mécanisme de sonnerie.
