Abstract (en)
[origin: WO2009034360A2] A shampoo suspending medium comprises: A. a higher HLB surfactant with an HLB greater than 37, such as alkyl ether sulphate; B. a surfactant with an HLB lower than 30, in a proportion to the higher HLB surfactant sufficient to provide a total surfactant with a mean HLB between 13 and 37; and C. sufficient of a carbohydrate and/or electrolyte structurant to form a stable system. The composition is capable of suspending selenium sulphide or cationic surfactants. Mica can be co-suspended with selenium sulphide in an anti-dandruff shampoo to provide a more homogeneous looking composition.
