Abstract (en)
[origin: CA2699099A1] The invention relates to a mould (10) for the continuous casting of metal, comprising a cooled running surface (11) and a guide means (12) for molten metal comprising a refractory material, wherein the guide means (12) is disposed upstream of the running surface (11) in the direction of flow. The invention is distinguished in that the guide means (12) is radially prestressed.
