Abstract (en)

[origin: WO2009040254A1] A depositing/transporting-away device for slices of food is provided, comprising a rotary depositing device with a rotary support, which is rotatable about an axis of rotation and on which slices of food can be deposited, and with a height positioning device for positioning the rotary support at a particular height, wherein a driver device is arranged on the rotary support and can be used to transport slices of food deposited on the rotary support in a transporting direction transverse to the axis of rotation, and wherein the driver device is assigned a drive motor.
