Abstract (en)

[origin: WO2009036807A1] An apparatus comprising: - an envelope feeder (12) configured to feed envelopes (E) to a product receiving position; - a positioning structure configured to position the envelopes in said receiving position; - an inserter (7) configured to insert products into envelopes, positioned in the receiving position, in a product inserting direction; and - an envelope conveyor (29) to remove filled envelopes from the receiving position, in an envelope removal direction (X); wherein the positioning structure comprises envelope guides (33, 34) configured to abut two lateral envelope edges of each envelope that is in said receiving position, and a drive (M, 63, 64) to laterally adjust a position of at least one of the envelope guides (33, 34). The invention also relates to a method for placing a product in an envelope.
