Abstract (en)

[origin: WO2009047201A1] The invention relates to an automation device (12, 16, 18) with an execution mechanism (26) for control programs (28, 30, 32) and also a web-services stack (38) for communication with other automation devices (12, 16, 18) and/or automation software, and also to a method for programming thereof. For programming and configuration of the control program, the invention provides that the automation device (12, 16, 18) has an integrated, web-based programming interface (42). The method comprises the following steps: Set up of a connection between the web browser (22) and a web-based programming interface (42) integrated in the automation device (12, 16, 18), display of a programmer/configuration application in the web browser (22), generation of at least one control program (28, 30, 32) by use of a programming language, configuration of a web service (40) for access to the at least one control program (28, 30, 32).
