Abstract (en)
[origin: WO2009037052A1] The invention relates to a flexible electrical connection (28), via which a sensor module (10), having at least one electrical conductor (14), is electrically connected to a sensor module (10). The at least one electrical conductor (14) has first sections (32) and second sections (34) having an injected coating. The first sections (32) and the second sections (34) having an injected coating each have a different degree of deformability.
