Abstract (en)  
[origin: EP2201858A1] The present invention relates to hair dryer (100) having a fan and a heater (106). The hair dryer comprises a PCB board having programmable integrated circuit (IC) components mounted thereon, wherein the fan and the heater are also connected to the PCB board; a plurality of presets defining operating levels of the fan and the heater, alone or in any combinations; a multi-mode switch connected to the PCB board for controlling the plurality of presets, the multi-mode switch is positioned at an one-hand operable location on the hair dryer, wherein user is able to operate the hair dryer with only a hand holding hair dryer and controlling the plurality of presets through the multi-mode switch.
