Abstract (en)
[origin: EP2202381A2] The door (10) has a frame (18) movable with respect to another frame (20), where the former frame has a main closing surface (22) that is arranged opposite to a main closing surface (24) of the latter frame. Seals (32) are connected with the frames at an area of the main closing surfaces, respectively. The seal connected with one of the frames is inserted in a corresponding recess (26) formed in the other frame. The recess exhibits two contact surfaces (28) that face each other, where the seal lies only at the contact surfaces in a closed condition of the door.
