Abstract (en)

[origin: WO2009039837A1] The present invention relates to a variable device carrier (4, 5, 6), in particular for electrical and/or mechanical devices, wherein the device carrier is formed as a box beam section that is secured by screwed or clamped connections and in the box beam section there are extendable plates, mounted by means of sliding bearings or ball bearings and acting as a means for receiving longitudinal or transverse members, and providing a pattern of holes with and for different securing possibilities, and use thereof on all conventional seating and reclining furniture.
