Abstract (en)  
[origin: WO2009056398A2] The invention relates to a cosmetic agent for temporarily shaping keratin fibers, which contains, in a cosmetically acceptable carrier, 10 to 85% by weight, based on the entire agent, of at least one wax having a melting point in the range of 40°C to 90°C and 1 to 15% by weight of at least one composite powder, which is made up of (A) powder particles of a cured organosiloxane composition having an average particle diameter of 0.1 to 200 µm and (B) amorphous silicon dioxide particles having an average particle diameter of not more than 1 µm, the amorphous silicon dioxide (B) particles being immobilized on the surface of the powder particles of the cured organosiloxane composition (A). The invention also relates to the use of said agent for temporarily shaping hair.
