Abstract (en)

[origin: WO2009049998A1] The invention relates to a shaping shoulder (30) for shaping a film tube, comprising a shoulder jacket (44) as the support surface for a packing material web (26) to be fed and a shoulder wall (50) adjoining the shoulder jacket (44) along a shaping edge (46) and defining an axial direction (z) as a support surface for a film tube (32) formed from the packing material web (26) on the shaping edge (46), said film tube having a tube axis positioned in the axial direction (z). At least one opening (52), which can be connected to a vacuum source, is provided below the shaping edge (46) in the shoulder wall (50) for suctioning the film tube (32) to the shoulder wall (50).
