Abstract (en)
[origin: EP2051269A1] The device (100) has operating units fastened to a control unit (10), where the operating units are classified into two sets of two types, respectively. The operating units of one of the sets have operating regions (98) with different geometrical designs. The operating units of the other set are designed as a rotary actuator (96) or hub button, and the operating units of the former set are designed as a pressure actuator, where the device is arranged at an operating panel. The operating units of the latter set are arranged laterally to the operating units of the former set.
