Abstract (en)
[origin: EP2204102A1] The subject of the present invention is a heel hold regulation device of a heel portion, which consequently means adaptation of footwear to a user's individual foot shape in the heel area, which considerably contributes to comfort and functional stability of the foot. The regulation device changes the shape of the upper part of the heel counter (1) by means of a rotatably fastened heel support (3) of said heel counter (1).
