Abstract (en)
[origin: EP2204323A1] A wrapping machine (1) comprises a wrapping unit (2) for wrapping a product (100) with a film (50), first conveying means (3) and second conveying means (4) positioned respectively upstream and downstream of the wrapping unit (2) for moving the product (100) along a supplying direction (T), and a transferring unit (5) interposed between the conveying means (3, 4) to move the product (100) through the wrapping unit (2); the transferring unit (5) comprises transferring means (7) that is movable at least between a retracted position (A), wherein it does not interact with the film (50) being wrapped on said product (100), and an extended position (B), wherein the transferring means (7) supports and moves the product (100) through the wrapping unit (2).
