Abstract (en)

[origin: WO2009056326A1] The invention proposes a device for fitting a guide unit on a first furniture part which is guided for movement in relation to a second furniture part, wherein the guide unit comprises a fixed rail, which is arranged on the second furniture part, and a movement rail (2), which is arranged on the first furniture part. According to the invention, the device is designed for a movement rail (2) which is provided, at the rear end, with a hook element (3) with a hook nose (5) for fixing the first furniture part in the rear region. Also provided is an adjusting device (1) with an accommodating device (7) for engagement of the hook element (3), this device being located, in an assembled state, on the first furniture part, and the hook element (3) therefore engages in the accommodating device (7), it being possible to adjust the accommodating device (7) on the adjusting device (1) in at least one direction in space.
